PRESCRIBING LEAD
WOODLANDS SURGERY
5 WOODLANDS ROAD
REDHILL
SURREY
RH1 6EY

Dear Woodlands Road Medical Centre,

OpenPrescribing is a free, publicly funded service to make the national GP prescribing data more useful. We have graphs and data on all prescribing at Woodlands Road Medical Centre online and viewable by anybody at this link: op2.org.uk/g/H81058.

Your practice was in the top 20% of practices for prescribing a high proportion of broad spectrum antibiotics based upon the latest available six months of data.

This chart shows how **your practice** compares to **other practices** on % antibiotics prescribed which were broad spectrum:

Broad spectrum antibiotics (co-amoxiclav, cephalosporins and quinolones) must be used sparingly to avoid drug-resistant bacteria developing.

See more on your prescribing data online at this link: op2.org.uk/g/H81058. You can see your practice's performance on various prescribing measures, and do bespoke data searches on any treatment of interest. You can also view the prescribing of your neighbours, and any practice or CCG in the country.

These are intended as helpful indications - we appreciate that there are many reasons to prescribe different drugs in certain cases.

Please let us know if you have any feedback or wish to opt-out of this series of communications.

Yours sincerely,

The OpenPrescribing Team
Nuffield Department of Primary Care Health Sciences, University of Oxford

PRESCRIBING LEAD
OAKMEADOW SURGERY
87 TATLOW ROAD
GLENFIELD
LEICESTER
LE3 8NF

Dear Oakmeadow Surgery (Ra Leach),

Your practice is one of the 20% highest prescribing practices for broad spectrum antibiotics over the last six months in England.

Here's how **Oakmeadow Surgery (Ra Leach)** compares to **other practices** on % antibiotics prescribed which are broad spectrum:

Broad spectrum antibiotics — co-amoxiclav, cephalosporins and quinolones — must be used sparingly to avoid drug-resistant bacteria developing.

We understand these drugs should be prescribed in some situations, and that it can be difficult to refuse them to patients who ask for them.

You can learn more about how your prescription rates compare to other practices at op2.org.uk/g/C82008

This letter uses data from OpenPrescribing, a free, publicly-funded service created by researchers in the University of Oxford to make national prescribing data more useful to GPs.

Please let us know if you have any feedback or wish to opt-out of this series of communications.

Yours sincerely,

The OpenPrescribing Team
