PRESCRIBING LEAD  
OAKMEADOW SURGERY  
87 TATLOW ROAD  
GLENFIELD  
LEICESTER  
LE3 8NF

Dear Oakmeadow Surgery (Ra Leach),

Your practice is one of the 20% highest prescribing practices for broad spectrum antibiotics over the last six months in England.

Here's how **Oakmeadow Surgery (Ra Leach)** compares to **other practices** on % antibiotics prescribed which are broad spectrum:

Broad spectrum antibiotics — co-amoxiclav, cephalosporins and quinolones — must be used sparingly to avoid drug-resistant bacteria developing.

We understand these drugs should be prescribed in some situations, and that it can be difficult to refuse them to patients who ask for them.

You can learn more about how your prescription rates compare to other practices at [op2.org.uk/g/C82008](https://op2.org.uk/g/C82008)

This letter uses data from OpenPrescribing, a free, publicly-funded service created by researchers in the University of Oxford to make national prescribing data more useful to GPs.

**Please let us know if you have any feedback or wish to opt-out of this series of communications.**

Yours sincerely,

The OpenPrescribing Team
